Description

Santuario Los Cabos - Sustainable Desert Living Lots

Santuario Los Cabos is a thoughtfully planned sustainable residential community designed around regenerative architecture and long-term environmental preservation. The master plan was created to live with the desert, not over it — protecting natural views, biological corridors, native flora and fauna, and the quiet character that makes this area of Los Cabos so special.

These homesites offer a rare opportunity to build a custom residence in a setting focused on privacy, nature, and architectural harmony rather than density and overdevelopment.
